

# Zinc Flake Technology

## Zintek® Black – A Revolutionary Unique Black Coating System

**Zintek® Black** combines Atotech's unique black base coat **Zintek® 300 B** with one of the **Techseal® Black** top coats, resulting in an exceptional deep black uniform appearance without any silver shine through and flake off even after handling.

Depending on the top coat used, a glossy or semi-bright look can be achieved. According to ISO 9227 the corrosion protection exceeds more than 720 h. Through a comprehensive range of Techseal® top coats Atotech provides the right product for diverse needs of today's global vehicle design.

### Features and Benefits

- The only black base coat available
- No silver shine through from handling damage
- Formulated to provide protection against initial white corrosion formation
- Top coats with unique features and lubrication for precise friction control
- Special planetary coating equipment designed to virtually eliminate recess head fill, when used together with our coating technologies
